

**SRN LUBRICANTS PRIVATE LIMITED**  
**PRODUCT DATA SHEET**

**CIIFROL ATLAS SERIES**

**Description:**

**Ciifrol Atlas series** of oils are highly refined mineral oils for general-purpose machinery lubrication. Atlas series of oils provide good oiliness for general lubrication under boundary conditions and are best suited for 'once-through' applications.

**Applications:**

Ciifrol Atlas series of oils are recommended for Industrial general-purpose lubrication where straight mineral oil is suitable. Heavier grades can be used for small open gears, looms and textile mill machinery, paper mills and machine tools etc. Atlas series are currently available in Viscosity Grades of 100, 150, 220, 320, & 460.

**Specifications:**

This is a propriety formulation of Ciif Lubricants

**Benefits:**

- Low Compressibility , volatility and foaming tendency
- Good thermal capacity and conductivity
- Excellent demulsibility and hydrolytic stability
- Good anti-corrosion and antirust characteristics

**TYPICAL PROPERTIES**

<b>CIIFROL ATLAS SERIES</b>					
<b>ISO GRADE</b>	<b>100</b>	<b>150</b>	<b>220</b>	<b>320</b>	<b>460</b>
Viscosity at 40°C, cSt	100 -110	150-165	220-240	320-330	460-470
Viscosity Index	90	90	90	90	90
Flash Point, COC, °C	200	210	220	230	250
Foaming Tendency	Pass	Pass	Pass	Pass	Pass
Rust Prevention Characteristics	Pass	Pass	Pass	Pass	Pass

**Disclaimer:**

The above given values are typical results; however the guaranteed specifications values are different and often lower than the typical values. For the guaranteed specifications, please discuss with SRN Lubricants representative or visit our website [www.ciifrol.co.in](http://www.ciifrol.co.in)
